# SERVICES

GBC Safety Glow's products are available in UV-Stable & Photo-Luminescent material and colors can be customized to fit your franchise's needs. UV products will glow under black lights while Photo-Luminescent products will also glow in regular low light/no light environments.

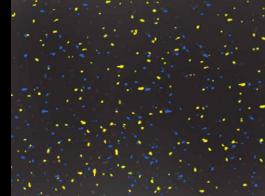

## DURABILITY → LONGEVITY

## NEW TRAMPOLINE PARKS

While construction is under way for your new trampoline park, use GBC Safety Glow's Glow Flakes to add an additional WOW factor. Glow Flakes can be applied to resinous flooring systems. They are customizable to meet your demands and price points.

### 1 STAIR TREADS

Proprietary anti-skid black substrate with embedded aggregate allows for optimal durability and extended longevity in heavy traffic areas. The colored reflective extrusion will not wear out. The wrap-around edge is ideal for use over concrete, stone, carpet, rubber, and wood and can help the appearance of a damaged step.

### 3 PERIMETER MARKINGS

Easy peel and stick perimeter markings can be used to illuminate paths of travel and objects to avoid in UV, low light, or no light situations. Markings are either .5" or 1" can be made to match your park's colors.

### 2 HANDRAIL MARKERS

Strong adhesion ensures your handrails remain marked even after continuous wear unlike standard glow-tape methods. Adding handrail markers will provide an easily visible path up or down the stairs.

### 4 GLOW PAINT

Glow paint can be applied to a clean, dry surface of a wide range of substrates including metal, wood, engineering polymer, composite, brick, and concrete. This product will start curing in only 10 minutes. Glow paint retains a wide functional temperature range and provides resistance to abrasion, sunlight, and chemicals.

## WHY CHOOSE US

GBC Safety Glow's products offer lifelong solutions to safety and fun. Installation guides are provided and installation is easy. Put down the color tape roller, GBC Safety Glow's UV and glow products are durable and built with high traffic in mind for increased longevity while holding their aesthetic.

All products are proudly made at our corporate headquarters in Kaukauna, Wisconsin. We believe in helping the local economy and take pride in everything that we create. Satisfaction is guaranteed.
